ULTRA 2000 (330ml tank)

Page 1

Ultrasonic cleaners function by producing sound waves that are transmitted into the tank and cleaning solution. These waves create millions of microscopic bubbles, which collapse or 'implode', releasing large amounts of energy, which scrub the surface clean. This process is called 'Cavitation'. These tiny bubbles create incredible cleaning results not only to the surface, but by penetrating the finer detail and recesses in jewellery and small items to restore them to their former glory. The

ULTRA 2000 is our entry level ultrasonic cleaner. It is small and compact in size, yet large enough to take a pair of glasses. It is very easy to use with simple 'ON' and 'OFF' buttons and a cleaning cycle that uses a timer with auto cut off after just 3 minutes.

Features:

- Fast, efficient, effortless cleaning
- Ultra-quiet operation
- Green cleaning uses warm tap water
- Innovative patented design
- High quality stainless steel tank
- Ultrasonic operating frequency 45KHz
- Mains power NOT battery for quality cleaning results
- Supplied ready to use no assembly required
- Full CE and RoHS approval

Specification:

Model name	ULTRA 2000
Timer settings	3 minutes with automatic shut-off
Tank material	Stainless steel SUS304
Ultrasonic frequency	45,000Hz (45kHz)
Power consumption	30W Max
Power supply	AC 220-240V 50Hz
Unit dimensions (LWH)	198 x 124 x 109mm
Tank size	420ml max / 350ml water level
Mains cord	1.5M fixed cord
Mains fuse	3A
Tank LxWxH	156 x 78 x 40mm
Outer Unit LxWxH	198 x 124 x 109mm
Basket LxWxH	N/A
Weight	600 grams
Optimal fill	330ml
Maximum fill	330ml
