

## **Agilent Cary 60 UV-Vis**

Efficient, Accurate, Flexible,

## **Guaranteed specifications**

#### Introduction

The Agilent Cary 60 UV-Vis spectrophotometer is efficient, accurate and flexible, and is designed to meet both current and future measurement needs. The proven, robust design of the Cary 60 comprises a double beam, Czerny-Turner monochromator, 190–1100 nm wavelength range, 1.5 nm fixed spectral bandwidth, full spectrum Xenon pulse lamp single source with exceptionally long life, dual silicon diode detectors, quartz overcoated optics, scan rates up to 24,000 nm/min, 80 data points/sec maximum measurement rate, non-measurement phase stepping wavelength drive, room light immunity, central control by PC with Microsoft® Windows® operating system. Supported by GLP software, optional 21 CFR Part 11 capable software, and dedicated instrument validation software which includes pharmacopeia test suites.

Agilent Cary 60 UV-Vis spectrophotometers are manufactured according to a quality management system certified to ISO 9001. The guaranteed specifications are listed in this document and are based on the 4 sigma statistical confidence level of the final acceptance tests performed at the factory.

#### **Instrument hardware**

Non-measurement phase stepping wavelength drive	Means that sample and reference measurements are made at the same wavelength ensuring that no peak shifts are observed — even when measuring at the fastest scan speeds.		
Focused beam measuring 1.5 x 1.0 mm	Ensures efficient energy coupling to accessories including fiber optic probes and ultra-microvolume cuvettes for measurement of low volume samples.		
Source			
	Unique full-spectrum Xenon flash lamp (80 Hz) with typical lifetime of 10 years (guaranteed 3 years)		
Monochromator			
	Czerny-Turner		
Grating			
	Holographic, 27.5 x 35 mm, 1200 lines/mm, blaze angle 8.6° at 240 nm $$		
Beam splitting system			
	Beam splitter		
Detectors			
	2 silicon diode detectors for simultaneous sample beam and reference beam measurements		
Optical design			
	Double beam Czerny-Turner monochromator		
UV-Vis limiting resolution (nm)			
	415		

Advantage/Benefit

Eliminates photobleaching while allowing the highest quality data to be

Unique optical design allows accurate sample measurement even with the sample lid open — especially useful for enzyme assays, fiber-optic

Gives excellent spectral resolution for solids and liquids and meets

Complete coverage of UV-Vis range and extending up into the NIR.

Allows complete spectral range scanning in under 3 seconds, ideal for

Allows accurate measurement of sub-second kinetic reactions with

Permits the analysis of highly turbid solutions and a wide range of

sample concentrations (optical densities), as well as reducing sample

collected over the complete UV-Vis range — all at the lowest cost of

ownership due to an exceptionally long lamp life.

based measurements or high throughput QA/QC labs.

international Pharmacopoiea compliance regulations.

fast kinetics or high sample throughput.

excellent data fitting.

≤ 1.5 nm

Toluene/hexane limiting resolution (EP/BP and TGA test)

# Recommended environmental conditions

#### Instrument dimensions (width x depth x height)

Packed  $595 \times 710 \times 350$  mm (24 x 28 x 14 in) Unpacked  $477 \times 567 \times 196$  mm (19 x 23 x 8 in) The Cary 60 has been designed to withstand the weight of a PC monitor up to 10 kg (33 lb)

#### Instrument weight

Packed 23 kg (51 lb), Unpacked 18 kg (40 lb)

#### Instrument conditions

Condition	Altitude (m, ft)	Temp. (°C, °F)	Humidity (%RH) non- condensing
Non-operating (transport)	0-4600, 0-15000	-40-75 °C, -40-167 °F	15–90%
Operating within performance specifications	0-3100, 0-10000	5–40 °C, 41–104 °F	50–80%

For optimum analytical performance, it is recommended that the ambient temperature of the laboratory be between  $20-25~^{\circ}\text{C}$  and be held constant to within  $\pm 2~^{\circ}\text{C}$  throughout the entire working day

#### Instrument electrical requirements

A standard 3.2 A/12 V plug pack is provided. Power cords are provided based on the user's country requirements. Only the supplied power supply is to be used with this equipment.

Required supply voltage 100–240 V AC, Frequency 47-63 Hz Nominal rating Scanning: 18 W, Idle: 9 W

#### Spectral bandwidth (nm)

Fixed at 1.5 nm (approximately)

#### Signal averaging (seconds)

0.0125-999 s

#### Maximum scan rate (nm/min)

24,000 nm/min

#### Slew rate (nm/min)

24,000 nm/min

#### Data interval (nm)

0.15-5.0 nm

#### Repetitive scanning

4800 data points per minute, maximum number of cycles: 999, maximum cycle time (min): 9999

#### **Operational**

# **Agilent Cary 60 UV-Vis guaranteed specifications**

Operational	Data collection rate

	Minimum sample volume	
		0.5 μL
Customer support policies	Support and training	
		Agilent is renowned for providing expert applications and service support. Agilent has a global network of factory-trained specialists ready to provide support for hardware, software, or applications wherever you are located. Services include:
		• Full 12-month warranty support
		<ul> <li>Seven (7) year hardware support period from date of last unit manufacture. After this time, parts and supplies will be provided if available.</li> </ul>
		Preventive maintenance to deliver consistent operation and minimize downtime
		Troubleshooting, maintenance and repair
		Software support services
		- Compliance services including IQ and OQ of hardware and software
		<ul> <li>Comprehensive warranty extension and service contracts, including peripherals</li> </ul>
		Classroom training and onsite training delivered by experts
